

## THE BODY LIFT:

Liu dies downstage.

The 4 executioner assistants will cross downstage (without your poles in hand) and straighten Liu out so she's lying flat on her back.

The 4 executioner assistants will pick her up together (a la light as a feather, stiff as a board) and carry her a few feet upstage to where you've placed your red poles all parallel to each other:

You will place Liu on your poles as indicated in the sad diagram below. Her head will loll back – adding to the “dead” effect.

Once Liu is solidly and EVENLY on the poles, you will each grab the ends of 2 poles each and lift TOGETHER – (knees bent - not backs, not arms)

You will then all step at the same time and exit, carrying Liu Upstage Right and off.
